

Dr. Amy Forman Taub

Advanced Dermatology
Lincolnshire, Illinois

ASK DR. TAUB

WHAT MADE YOU WANT TO MANAGE YOUR OWN DERMATOLOGY PRACTICE?

I had a successful career as a dermatologist in a group practice for 13 years, but really wanted to strike out on my own, and had a vision of what was possible. Seven years ago, I found a loft-like space and opened my own dermatology practice.

WHAT HAVE YOU DONE TO MAKE BEAUTIFUL SKIN MORE ATTAINABLE?

My practice offers laser and aesthetic services and is home to my skin-care boutique, Skinfo®, which offers over 400 skin-care products, including its own eponymous line. It also hosts professional skin-care and makeup consultations, using Colorescience® and glōminerals™ makeup and the novel VISIA® Complexion Analysis. In 2007, Skinfo expanded its boutique to the retail level and is open to the public daily without an appointment.

WHY DO YOU EMPLOY A GLOBAL PHILOSOPHY?

I look at someone's entire face because working on just one line won't make them look better.

Nonsurgical solutions

According to Dr. Taub, nonsurgical facial rejuvenation has generated unprecedented buzz in three areas: skin pigmentation, skin laxity and skin volume. "At SKINQRI, our research center, we evaluate many treatment devices and techniques. My recommended nonsurgical repertoire includes pigment and textural rejuvenation (photorejuvenation, Fraxel re:store™, Pearl laser peels and eMatrix), skin tissue tightening (Thermage, Titan and ReFirme ST), and muscle stimulation for enhanced volume (the Pan G™ Lift, a muscle-stimulating procedure). In addition, I recommend wrinkle correction with Botox or Dysport, and injectable fillers (Restylane, Juvéderm, Perlane and Sculptra Aesthetic) for volume and line correction. Cosmeceutical skin care is also a must to boost and maintain every treatment program."

VELASHAPE AND THERMAGE

HOW CAN I GET RID OF STUBBORN CELLULITE?

VelaShape and Thermage are both FDA-cleared to reduce cellulite, safely and effectively firming problem areas. In fact, VelaShape is touted as the first FDA-cleared nonsurgical solution for circumferential reduction, slimming the body with absolutely no downtime. Likewise, Thermage uses radiofrequency vibrations to improve the appearance of cellulite noninvasively, smoothing, tightening and contouring for a leaner physique.

“patients respond positively to us because we’re honest and caring”

WHEN A CAREER AS AN ARTIST TOOK A TURN TOWARD MEDICAL SCHOOL, DR. AMY FORMAN TAUB FOUND A PASSION THAT STUCK. THROUGH HER COSMETIC DERMATOLOGICAL PRACTICE, SHE NOW CREATES BEAUTY OF A DIFFERENT KIND EVERY DAY. “WE BRING SOMEONE’S INNER BEAUTY OUT. THAT’S THE PART I LOVE,” SAYS DR. TAUB. “MY PASSION IS DERMATOLOGY. I NEVER GET TIRED OF IT OR THE SATISFACTION OF BEING ABLE TO HELP PEOPLE LOOK AND FEEL BETTER.”

MEET THE EXPERT

Dr. Amy Forman Taub

American Board of Dermatology

ABOUT DR. TAUB

HOW WOULD YOU DESCRIBE YOUR CHAIRSIDE STYLE?

I'm accessible, I listen and I care.

WHAT ONE LIFESTYLE CHANGE COULD MOST BENEFIT PATIENTS' OVERALL HEALTH?

Create a personal and work environment that leads to emotional well-being.

WHAT ARE SOME OF YOUR FAVORITE HOBBIES?

I like skiing, tennis, weight training, playing with my son and watching professional sports.

WHAT CAN PATIENTS DO TO LOOK YOUNGER?

I recommend Botox, fillers and tissue tightening. They're all nonsurgical and garner impressive results.
